

WE CAN HIRE THE RIGHT PEOPLE FOR THE RIGHT JOB!

North American Mine Services (NAMS) started in 1964, since that time we have provided contract services to hundreds of satisfied clients in mineral exploration and mining industries. Our specialties are permitting, land work, GIS services, and providing professional technical personnel on a contract basis. We are based in Utah, but work throughout the western USA.

It is the people that do the work we do that make the difference. We take pride in the mining business, paying attention to schedules, staying in budget, listening and communicating to our clients, and getting the job done right in a professional and timely manner.
